HEALTH EQUITY & POLICY LEADER DEVELOPMENT PROGRAM

This program is virtual and asynchronous.

Program Overview

This Health Equity and Policy Leader Development Program aims to provide an in-depth exploration of health disparities, health equity, social determinants of health, cultural competence, social justice, structural violence, health policy, leadership, and health communication. Program participants will gain an understanding of the complex interplay among these factors and their impact on health outcomes for individuals and communities. The course also emphasizes the importance of developing effective leadership skills and strategies for promoting health equity through policy and action. Throughout the program, participants will apply their knowledge and skills to real-world scenarios, enhancing their ability to effectively address health disparities and promote the advancement of health equity in health care and public health.
